Eskimo 13 Apartment Essentials

Mains Water

The mains water should be on. The shut off is in the cupboard in the corridor just outside the apartment door. It is the far left door and the top tap. If the tap is parallel with the pipe, the water is 'on'.

Mains Power

The mains power should be on. The power box is on the right entering the apartment, behind a small wooden door. When the black button is pushed in, power is 'on'; when the red button is in, power is 'off'. This is a trip system: all the trip switches should be in the 'up' position for 'on'.

Hot water

Hot water for this apartment is supplied by its own electric tanks. The water is heated overnight and in the afternoons on off-peak power. The tanks function automatically and should provide enough hot water.

Heating

Heating is individual to the apartment, supplied and controlled by electric wall-mounted radiators. The radiators normally have an on/off switch as well as being controlled by a thermostat. They will either be calibrated on a numerical scale or a temperature scale. For maximum comfort and efficiency they are designed to operate at between 4-5 or 18-20 degrees.

Please do not dry items of clothing directly on the radiators as this can restrict the airflow and cause the device to trip.

Maintenance and Breakages

Things break. Please inform the AMS office immediately of any breakages or problems in the apartment. Please do not leave it until the end of your holiday.

Ski Lockers/Casiers à Skis

Skis and boards must be stored in the ski lockers on level -1. The lockers are at the bottom of the stairs and through the door on the right. Your locker is no 13. There is a door to the outside from here; please remember to lock it when you leave.

Parking

You have one parking space in the underground garage A. The parking entrance is not far back down the hill from the Chalet, on the left where you would otherwise turn right to the roundabout. It is space A26. The garage entry height is 2 metres. The remote control to gain access is in the apartment. Details of resort parking are shown on the resort map.

Inside Your apartment

Cleaning products

There should be a selection of cleaning products in the apartment. Please replace any that you finish.

Door Lock

To lock the door, close and lift the handle to the near vertical position, the key will now turn and lock the door.

Electrical sockets

A number of the electrical sockets are designed to be used for lighting and are turned on and off via the wall switch. If you have a problem with an appliance such as the vacuum cleaner, please try it in a different socket.

Fireplace

When using the fire, please ensure the fireguard is firmly closed. Wood is on the balcony - please let us know when it starts to run low.

Light bulbs

There is a supply of light bulbs in a plastic box in the hall cupboard. Please inform us of any you use.

Safety

For your safety the apartment is fitted with two fire extinguishers which are situated in the living room and at the top of the stairs. Smoke alarms are situated in the living room, the upstairs corridor and the mezzanine. There is also a fire blanket next to the sink in the kitchen.

Security

Please ensure that you do not encourage opportunism by any undesirables: keep your property secure. When leaving the property check that all doors and windows, including any balcony doors are closed and locked.

Television

The apartment has a TV and a DVD player.

Exterior Facilities

Local bakery/boulangerie

The nearest bakery is on the main road at entrance to the Méribel Village development.

Parking

There is one specific parking space with this apartment in under ground garage A. The parking entrance is back down the hill from the apartment, on the right before the roundabout. It is space A26. The garage entry height is 2 metres. The remote control to gain access is in the apartment. Please refer to the 'Resort Information' section in this folder for further details of resort parking. As a rule of thumb, you may not park on the streets in the resort unless indicated otherwise.

Recycling & Rubbish Disposal

All rubbish must be removed from the property. There are recycling and rubbish bins throughout the resort. Please refer to the recycling and rubbish point map in the Documents section of [myAMSRentals](#).

Getting out on the Slopes

Lift and Piste Access

The chairlift and piste are just across the main car park. The chairlift takes you up to the Altiport area.

Ski Bus

The nearest stop for the free shuttle bus which runs regularly through the resort is on the small roundabout by the car park/Spar. All bus stops are marked with a red dot on the Resort map.

Ski Rental

The nearest shop is the Ski Set Sports Village shop, just by the Spar supermarket on the roundabout. There are many ski rental shops in Meribel. For the best deals look under the Partners section of Documents on [myAMSRentals](#).

We strongly recommend you take out the ski insurance they offer to cover theft and damage.
